A highly motivated and experienced backend engineer with 4 years of expertise in Java development and 1 years in Go (Golang) development. I am passionate about designing and building scalable, high-performance systems that meet the needs of clients and end users. Over the years, I have developed a deep understanding of the principles of backend development, including designing, maintaining, and optimizing robust systems. Additionally, I have gained hands-on experience with various technologies, frameworks, and best practices, which I believe can contribute positively to the success of any team or organization.

Education

Univesity Of Teknokrat Indonesia *Bachelor Degree in Informatics Engineering* | GPA : 3,58 / 4, 00

Bandar Lampung, Lampung
Jun 2016 - Mar 2020
